

M. ROBIUL HASAN

IT SUPPORT ENGINEER L2 | MICROSOFT 365 & AZURE ADMINISTRATION | ENDPOINT SECURITY & IT INFRASTRUCTURE

Dhaka, Bangladesh | +8801843212123 | rhasan229@gmail.com | linkedin.com/in/robiul-hasan-401296137 | github.com/Daddy-Ousen

PROFESSIONAL SUMMARY

IT infrastructure and support professional with 5+ years of experience across Microsoft 365 administration, Azure environments, endpoint security, and enterprise service desk operations. Currently L2 Support Engineer and Service Desk Co-Leader at Techants Solutions, coordinating infrastructure support for 2,500+ endpoints and 1,100+ security assets across a diverse portfolio of client environments. Experienced in escalation management, business continuity/disaster recovery (BCDR) reporting, and training and mentoring service desk staff. Actively building automation and agentic AI workflows to streamline IT operations, including a self-hosted AI assistant with tool-calling and browser automation. Now pursuing growth into systems administration and cloud infrastructure roles.

TECHNICAL SKILLS

Cloud & Identity: Microsoft 365 Administration, Microsoft Azure, Entra ID (Azure AD), Exchange Online, Microsoft Intune

Infrastructure: Windows Server, Hyper-V, Active Directory, DNS & Networking, Datto BCDR, Datto RMM, Endpoint & Antivirus Security

Operations: Incident & Escalation Management, Service Desk Leadership & Staff Training, IT Documentation & SOPs, Client/Stakeholder Communication

Automation: Python & Bash scripting, LLM/agentic workflow automation, self-hosted AI deployment

PROFESSIONAL EXPERIENCE

Techants Solutions Pty Ltd

Oct 2022 – Present

L2 Support Engineer & Service Desk Co-Leader

- Led delivery and technical coordination for 25+ enterprise IT projects across diverse client environments, and collaborated on 5+ additional large-scale rollouts.
- Managed monthly maintenance and monitoring across 2,500+ endpoints and administered antivirus/endpoint security for 1,100+ devices.
- Co-led a 10+ member Service Desk team, training and evaluating L1 staff on new systems, tools, and escalation handling.
- Delivered quarterly BCDR reports and deployed backup/disaster-recovery agents across client endpoints; maintained SDO compliance.
- Sustained customer satisfaction above 90% while managing complex escalations across multiple concurrent client accounts.

Cobait Dhaka

2021 – 2022

Jr. Support Engineer

- Served as first point of contact for client calls, troubleshooting technical issues and resolving inquiries in a fast-paced, high-ticket-volume environment.
- Diagnosed and resolved application-level technical issues across managed customer accounts.
- Administered client server infrastructure and maintained server data backup processes.

AQSBD

2020

Information Technology Executive

- Digitized outdated manual systems and led infrastructure documentation and process improvements.
- Streamlined internal communication systems and IT support processes for the organization.

PROJECTS

Hermes — Self-Hosted AI Assistant (Personal Project)

Feb 2026 – Present

- Built and self-host an AI agent with tool-calling, browser automation, and messaging integration to automate personal workflows and explore agentic AI architectures.
